80G1E

GAS FURNACES

A CHOICE YOU CAN
WARM UP TO. RIGHT NOW.

A photograph of a man with grey hair, smiling broadly, sitting on a couch. Two children, a girl in a pink shirt and a boy in a striped shirt, are laughing and hugging him. The scene is warm and joyful, set in a bright, indoor environment.

**THE RELIABILITY OF THE
DUCANE™ 80G1E IS THE RIGHT
CHOICE, RIGHT WHEN IT
COUNTS.**

When the time comes to replace your furnace, reliability is a top priority. When you choose a Ducane 80G1E gas furnace, you can enjoy dependable warmth throughout the winter season. That's because the 80G1E is built and tested for toughness. And with an AFUE rating of 80%, it works hard, while using energy efficiently. It's one of the simplest decisions you can make.

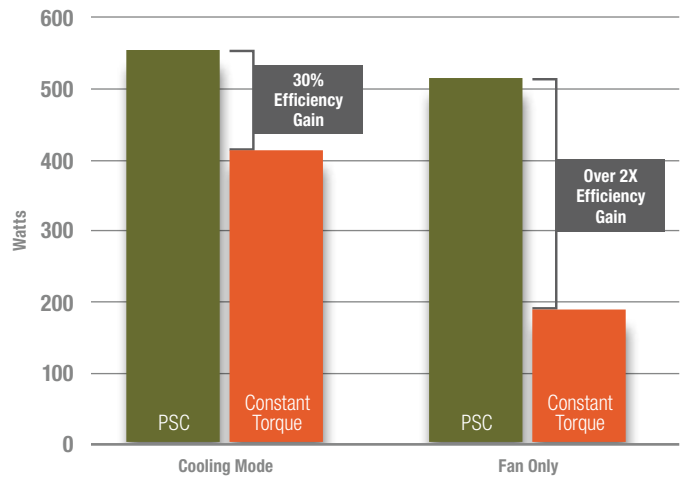

SOME DECISIONS ARE TOUGH. THIS ONE ISN'T.

When you consider Ducane systems, quality and value are givens. You're getting peace of mind with great features and smart designs that squeeze more efficiency out of every energy dollar. And best of all, you get it right now.

Harsh winters are no match for our ruggedness.

Every component of the 80G1E is built for dependable operation. The constant torque blower motor uses proven technology to efficiently circulate heated air throughout your home. When compared to standard motors, constant torque motors operate with 25% fewer watts while operating in cooling mode and up to 75% fewer watts in fan-only mode.

Over the years, a hardworking Ducane furnace can save you hundreds of dollars on utility bills.

Savings vary depending on use, geography, lifestyle, maintenance, installation and other factors. Chart depicts 5-year savings over less-efficient models.

Smart in every way.

The 80G1E furnace offers an Annual Fuel Utilization Efficiency (AFUE) of 80%, meaning it can convert 80% of the fuel it uses into heat you can feel. So you can spend less on energy even when the weather is at its harshest.

A LOOK INSIDE THE RUGGED, HARDWORKING 80G1E.

- An 80% AFUE* means the 80G1E converts a full 80% of the fuel it consumes into usable heat. That can help you spend less on energy every month
- A 10-year limited warranty on parts and a limited lifetime warranty on the heat exchanger (with registration)** mean lasting comfort and peace of mind
- The aluminized steel heat exchanger resists corrosion, and is crimped instead of welded for long life and safety
- The anti-vibration blower assembly helps reduce noise during startup and shutdown for peaceful, quiet operation
- Every 80G1E is fully run-tested at the factory to ensure reliable performance
- Efficient constant-torque motor delivers consistent warmth while using energy wisely

**Like the miles-per-gallon rating on your automobile, the higher the AFUE rating, the lower your fuel costs. All furnaces manufactured today must meet minimum AFUE requirements. If your furnace is 10–15 years old, it probably falls below the current minimum and wastes energy.*

***Applies to residential applications only. For terms, conditions and exclusions, see full warranty at alliedair.com.*

DUCANE™ – THE DECISION YOU'LL CELEBRATE.

When you think about everything Ducane delivers, your decision is no decision at all. Stay cozy. Stay comfortable. The performance and reliability you want are right here, and ready to go to work. **Ducane. It's the right choice. Right now.**
